JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

WEST INDIES.

Report from Bridgetown, Barbados—Further relative to yellow-fever cases from British naval vessel Indefatigable.

The following information, received from the general board of health, Bridgetown, was forwarded by Consul Clare, under date of November 20:

Three men from the British man-of-war *Indefatigable*, who were sent on the afternoon of November 18 to the general hospital, supposed to be suffering from dengue fever, developed yellow fever in the night, and 1 died yesterday morning. The other 2 were sent to the quarantine hospital. Five other men from the same ship were also sent to the latter hospital, suffering from fever, 2 of whom have since developed yellow fever. The wife of the resident surgeon at the general hospital also died there yesterday morning from yellow fever. The source of the disease has not been ascertained. Every precaution possible has been and is being taken to prevent the disease from spreading.

(See Public Health Reports, November 29, 1907, p. 1744.)

November 24.—Consul Clare reports no further development of yellow fever at Bridgetown.
